Brazil Senate approves benefits reform in second day of session SAO PAULO, April 22 (Reuters) - Brazil's Senate on Wednesday approved in the second day of its legislative session a controversial benefits reform bill that critics say will lead to less money for health and education spending and benefits to the country's wealthier people. The bill, that aims to eliminate direct transfers to poorer Brazilians, including many farm workers, made its way through the Senate floor on Tuesday with the support of several legislators of the ruling Workers Party. The Chamber of Deputies, Brazil's lower house, is expected to approve it on Thursday, although there are signs lawmakers of the ruling Workers Party are trying to soften the bill. Brazilian President Dilma Rousseff, who supports the bill, said it was designed to improve public policy to boost the economy. But critics say the bill would decimate public spending. Some legislators from the opposition parties, who had earlier said they would vote against the bill, later voted to support it. "It is a bill that will benefit the wealthy, not the poor," said Senator Moreira Franco, from the centre-right DEM party. "It is a bill that will favor the businessmen, the consumers, and not the farmers, the workers and the elderly," he added. Other critics point out that the bill will eliminate the government's public spending on direct benefits to poorer Brazilians, also known as transfers. Brazil's federal government is to be slashed in size through the reform. The government's total spending, in dollars, is expected to fall to 41.4 billion reais (\$14.3 billion) from an estimated 57.8 billion reais now, the Finance Ministry said. But the government will also cut spending to create a reserve to pay for its deficit. The bill will also eliminate government programs including the Bolsa Familia scheme, the program to distribute monthly cash payments to some 12 million Brazilians. Some analysts say the benefits
