The most anticipated fantasy action RPG from Cyanide Studio is now available for iOS, Android, Windows PC, and PlayStation 4! New game! World-renowned gaming company Cyanide Studio's long-awaited fantasy action RPG is finally here! Play as a Tarnished Knight who rose to become a sword-wielding warrior in a massive MMORPG. Freely explore a vast world through swords and magic, then form a party to deal with monsters and other players. Battle together with friends in real-time, or grow in strength and form a party of four or five! Explore a vast, world-renowned gaming company's ever-larger RPG fantasy world. Experience an epic tale of the Lands Between in a vast, open world where you can freely travel at your pace. Explore an expansive world and fight together with friends in real time. Choose your party from a vast selection of unique characters, from paladin knights to dwarven smiths. What is interesting is that unlike previous Cyanide Studio titles, Sins of a Dark Age and Ori and the Blind Forest, this upcoming game is NOT an MMORPG. Sins of a Dark Age was published by 989 Studios, a Japanese studio, and Ori and the Blind Forest was published by Annapurna Interactive, an American studio. Cyanide Studio is an independent publisher and game studio, and they focus on creating games that they love, including online RPGs, and that's why this new RPG title is called Tarnished Knight. The decision to go with a franchise-branded title was a tough one for Cyanide Studio, but they feel it's the best way to go. While the game's story will be set in a vast fantasy world, the player character is a typical RPG hero who has to experience a journey from starter character to a skilled, tactical knight. The map of this new fantasy RPG is vast and includes three territories, North, Central, and South. Each one has its own theme and when you move to a new territory, the situation changes accordingly. For example, the Central territory is a war-torn land where monsters roam and a great evil is expected. On the other hand, the South territory, which is the largest of all three, is a peaceful land with rich resources, so it's the perfect place to mine resources. Meanwhile, the North territory is a bleak land where dungeons are plentiful, so it's also a great area to hunt for monsters. The gameplay
