Managing a route network is challenging and has become increasingly important, especially for the service providers that have implemented or plan to implement a wireless broadband access network. The ever increasing traffic demand continues to increase pressure on limited bandwidth resources resulting in the need for many carriers or service providers to manage their networks efficiently in order to minimize delay and packet loss or latency while maximizing the overall efficiency of the networks. This is especially true when managing radio link connections for Long Term Evolution (LTE) wireless carriers and devices. Conventional solutions for managing these demands are resource inefficient and/or require a high degree of user and/or device intervention. Currently the efficiency of network monitoring protocols is low, many access routers that are installed

Suguri aims to put a new spin on the bullet hell genre, offering a more solid blend of action and strategic gameplay. There are a few potential problems with the game design, however, none of them are major enough to diminish the experience. At the forefront of Suguri is a simple yet effective bullet hell type of gameplay. There are eight rounds in the game, each of which take a few seconds to complete. The whole process of clearing a round is simple, but the timing of the special attacks is what will make the game a challenge. Once you've finished off all of the rounds, the player is given the opportunity to choose one of three levels to move to. The levels have four boss battles and offer enough difficulty for anyone playing the game. The main weakness of the gameplay is the inability to play without a PlayStation 2, making the game much less interesting for people with Microsoft Windows PC's or Mac's. The game does not have many options for tweaking the gameplay. That being said, it's the very fast gameplay that will make Suguri interesting. The cutscenes are quite entertaining and the game does a great job of depicting the

---

manga-like story of the original Suguri. Overall The graphics are much improved and the game does a decent job at making the characters easy to follow. The sound is fairly good for a game with a Japanese theme, although its a bit of a shock to hear sound effect for objects like bombs that have been obsolete since the 80's. The music is passable and the sound effects are engaging. All in all Suguri is a good demo. Fans of the original Suguri game should enjoy the new incarnation, as its a good blend of action and strategy.

Newcomers to the bullet hell genre will certainly find it worthwhile to play. Anyone who isn't a fan of the bullet-hell genre can pick up this game without missing any plot points. It's a pretty good story line for the bullet hell genre. Plus, the story takes place in the future on Earth, which is incredibly different from the standard in-space settings. All of the characters are well-developed and the game makes use of its extensive cast to handle the situations that arise in the story. The gameplay does have its flaws, but it's hard not to smile at the amount of challenge this game has, when even if you lose a life you can use the Time Machining ability to get back to the start of the

level. The coolest feature of the game is the fact that

**(2003 film) Housebreaker is a 2003 Indian Hindi-language action crime thriller film directed by Kunal Deshmukh and written by Rohit Adam, who also wrote the film's story. Starring Akshay Kumar, Aishwarya Rai, and Lakshmi in the lead roles, the film revolves around three college students who plan to rob a millionaire's house while the millionaire and his wife are away. Housebreaker follows the first three phases of what is often referred to as the "going to college in India scams". The film also stars Tota Roy Chowdhury, Prashant Narayanan, and Satyen Kappu, and is the first film in the Housebreaker franchise. The project to make Housebreaker initially began in 1994, during the 1993 Indian financial crisis where the Indian film industry lost \$300 million. Adam's story began to infuse into his work simultaneously alongside the 1993 financial crisis, and he worked for two years to write the story. In 2002, Kunal Deshmukh accepted to direct the film after viewing the script. Kunal, alongside his co-director Jatin Verma, decided they would make the film with high definition video, something they considered the "next step" for Indian cinema. Yuvan Shankar Raja composed the film's soundtrack while Kunal and his team decided they would set the film primarily in Mumbai. Housebreaker was made over a five-month period throughout June-September 2002. Plot While sleeping, an ambitious young man gets dreams of his future. In the day, he lives as a model and struggles to meet the high living costs demanded of him by the clothes retailer where he works. Deepak Periwal (Akshay Kumar) dreams of fleeing Mumbai and finally getting away from all the material possessions. He dons different costumes, including an eye patch and a Roman toga, while relishing the freedom of clothes clothes, and relishing the freedom to do what he wants. In the next scene, he destroys his life's possessions in a fit of rage when a woman's phone goes off in his bag when he's supposed to be meeting a client to discuss a possible business with her. Deepak meets his girl, Pooja (Aditi Gowitrikar), in the market. After dinner,**

he invites her to his room to continue their date and to seduce her into being his. As they are sleeping, he startles her when he pulls off her mask and sees
